## Projects

---

### Barbershop Website

- Developed a professional website for a newly-opened barbershop showcasing strong technical skills in HTML/CSS and JavaScript.
- Created a user-friendly website with multiple navigation bars and sections, including Home, About, Services, Team, Testimonials, and a Footer, to provide a seamless user experience.
- Implemented responsive design techniques to ensure the website is mobile-friendly and looks great on all devices.

### Admission Checker

- Developed a Python program using Selenium to automate the process of checking admission status for multiple universities, including CSU Long Beach, CSU Northridge, CSU Fullerton, and CSU Los Angeles.
- Built the program from scratch using Python, including inputting student information and navigating to the appropriate pages for each university.
- Researched and troubleshooted issues, including navigating input fields with the same ID on different pages, and used the wait() function to resolve these issues.
- Created a program that streamlines the process of checking admission status for multiple universities, reducing the time and effort required to do so manually.
