Los Angeles, CA | 323-344-2312 | koayenay@gmail.com | www.arfanmyint.com

SUMMARY

Detail-oriented IT professional with over 4 years of experience managing multi-location enterprise systems and support platforms. Skilled in Zendesk, Microsoft 365, and network infrastructure administration. Passionate about optimizing support workflows, automating processes, and ensuring data security across global operations. Experienced in using GitHub for script versioning and deployment tracking; familiar with CI/CD workflows for system configuration management.

EDUCATION

California State University of Northridge

Aug 2020 - May 2024

Bachelor of Science in Computer Science

GPA: 3.43

- STEM Advantage Program - Alumni
- CodePath - Scholar
- Society of Hispanic Professional Engineers (SHPE) - Member

TECHNICAL SKILLS

Support Platforms: Zendesk, Jira, Slack, Microsoft Teams, Zoom, Paytronix, HotSchedules.

Technical Troubleshooting & Support: Hardware and software troubleshooting, VPN configuration, remote desktop support, minimizing downtime, patch management, end-user training documentation.

Systems & Networking: Windows, macOS, network administration (VLANs, VPNs, firewalls), Active Directory, Azure AD (Entra ID), Microsoft Admin Center, SonicWall, Meraki, Ubiquiti.

Tools & Platforms: Microsoft 365 (Teams, SharePoint, Exchange), Microsoft Endpoint Manager (Intune), Jira, Slack, Zoom, LogMeIn.

Scripting & Databases: Python (automation and scripting), SQL, PowerShell, Bash.

Point-of-Sale & Communication Systems: POSitouch, Ooma, Zoom Phone configuration, Ingenico, Shift4, VoIP Administration, CCTV management.

Cloud & Version Control: Microsoft Azure (security and compliance), Terraform (IaC), Git, GitHub.

EXPERIENCE

IT Analyst

Dec 2024 – Present

Urth Caffé

Los Angeles, CA

• System Administration & User Management

- * Administered **Microsoft 365, Azure AD, and Intune**, managing user access, security policies, and group permissions across **Outlook, Teams, SharePoint, and OneDrive**.
- * Administered **Zendesk** for user provisioning, role management, and ticket routing; collaborated with **HR and Operations** teams to streamline support workflows and reduce response times.
- * Oversaw **user lifecycle management**, including onboarding/offboarding through **Paytronix, Talentreef, and Zendesk**, ensuring **role-based access control (RBAC)**.
- * Designed and enforced **security policies**, including **multi-factor authentication (MFA)**, **conditional access**, and **password management protocols** to enhance system security.
- * Automated repetitive administrative tasks using **PowerShell scripting**, improving efficiency in user provisioning and system updates.

• Menu Management & POS Administration

- * Managed **PopMenu, PosiTouch, and Paytronix** platforms, ensuring seamless integration between **online orders and in-store POS systems** by troubleshooting mislinked menu items and discrepancies.
- * Conducted **overnight system updates** to apply **menu changes, pricing updates, and tax rate adjustments** across all store locations, ensuring accurate and timely rollouts.
- * Troubleshoot **credit card processing issues** on POS terminals, diagnosing **payment failures, batch settlements, and connectivity errors** for seamless transactions.
- * Remotely accessed and managed **POS systems across multiple locations**, resolving **software glitches, transaction errors, and system outages**.
- * Configured and activated **employee swipe cards** for Paytronix, ensuring proper integration with **HotSchedules** for accurate time tracking and scheduling.

- * Implemented and scheduled **automated Windows updates and POS maintenance tasks** during non-business hours to minimize disruptions and enhance system security.
- **IT Support & Infrastructure Management**
 - * Provided **Tier 1 & Tier 2 IT support** across 9 locations, resolving software, hardware, **network, and VPN issues** for over 250+ employees.
 - * Implemented **Mobile Device Management (MDM)** solutions, including **Apple MDM and Microsoft Endpoint Manager**, ensuring **secure device enrollments and compliance**.
 - * Diagnosed and repaired **IT hardware**, including **desktops, laptops, dual monitors, thermal receipt printers, and secure print servers**.
 - * Configured and maintained **POS systems (PosiTouch), payment terminals (Ingenico)**, and secure transaction processing, reducing checkout downtime.
 - * Developed **IT Helpdesk SOPs**, reducing ticket resolution time by 30% and improving first-call resolution rates.
 - * Assisted in **IT asset lifecycle management**, tracking inventory across all locations and streamlining procurement processes.
- **Network & Security Engineering**
 - * Designed and maintained **network infrastructure**, managing **Ubiquiti and Cisco switches, Aerohive Wi-Fi, and SonicWall firewalls** across multiple retail locations.
 - * Diagnosed and resolved **network performance issues**, including **VLAN segmentation, bandwidth optimization, and QoS policies for VoIP services**.
 - * Deployed and managed **Ooma and Zoom Phone systems**, ensuring stable **VoIP communications** and reducing call disruptions by 40%.
 - * Implemented and monitored **endpoint detection and response (EDR)** solutions to detect and mitigate cyber threats.
 - * Led **incident response planning**, including forensic analysis, threat containment, and reporting, in compliance with **PCI DSS requirements**.
 - * Supported **data privacy and retention protocols** in compliance with **PCI DSS** and internal **data governance standards**.
 - * Partnered with **HR and Legal** teams to ensure secure access management and data handling across multiple platforms.
 - * Configured and enforced **DMARC, DKIM, and SPF policies** to enhance email security and prevent phishing attacks.
- **Key Contributions & Advanced Projects**
 - * Created and documented **40+ IT SOPs**, including **troubleshooting guides, security protocols, and onboarding workflows**, improving operational efficiency.
 - * Successfully recovered **critical financial and operational data** from **Carbonite backup systems**, ensuring business continuity.
 - * Led **security awareness training initiatives**, educating staff on **phishing, social engineering, and compliance best practices**.

Undergraduate Research Assistant

Aug 2023 – Dec 2024

Boracle

Northridge, CA

- Developed a **React.js**-based frontend for Boracle, boosting user interface responsiveness by 40%, leading to enhanced user satisfaction and engagement.
- Established **RESTful APIs**, enabling seamless communication between wearable devices and the Boracle platform, which facilitated a 25% increase in data integration efficiency.
- Developed user opt-in data sharing features using **OAuth2.0** for authentication and **JWT** for session management, enabling an anonymized dataset accessible via secured APIs.

IT Support Technician

June 2020 – July 2023

7-Eleven

Torrance, CA

- Provided **first-line technical support** for store equipment, including **TwinPOS systems, California Lottery systems, money order machines, printers, and POS systems**, effectively reducing operational downtime.
- Configured and troubleshooted **money order machines, credit card terminals, and secure print servers for printers**, ensuring seamless transaction processing.
- Managed and updated **California Lottery system**, including updating lottery numbers and resolving redundant lottery data issues.
- Onboarded and offboarded employees using **ADP Payroll Systems**, resolving payroll-related issues and ensuring smooth HR operations.
- Updated **POS menus, implemented price changes**, and optimized store operations through accurate system configurations.
